

## POCKET DOOR HARDWARE

Pulls and pull-lock combinations suitable for sliding pocket doors. All four models feature side pulls and an edge pull. All are textured by hand and finished to either Dull Black powdercoat or brushed Brass. Instructions included to install any model into a single notch cut-out in the pocket door. Supplied with wood screws in matching finish, and strike plate (where applicable).

Example of M400 in Dull Black textured finish.  
 All models measure 2-3/4" tall, 2-1/2" across  
 All require minimum door thickness 1-3/8"  
 All require maximum door thickness 1-5/8"  
 Strike measures 1" x 2-1/4"

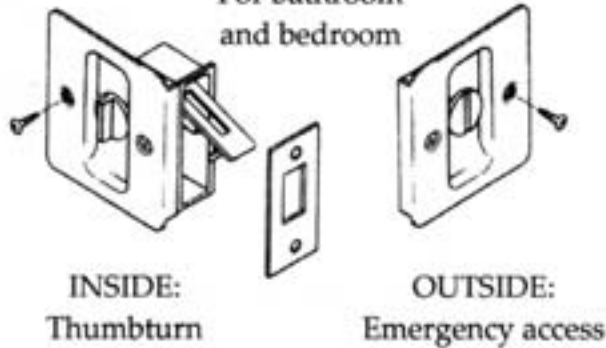

Squares in photo background are 1/2" x 1/2".

End pull shown in extended position at right. End pull swings out with the touch of a finger, and is used to pull the door out of its pocket to slide it closed.
