

## DOOR KNOCKERS

With over 50 different patterns, the handmade Kirkpatrick door knockers represent one of the widest selections of styles and sizes. The smaller types, sometimes called "bedroom knockers," are often used inside residences, in inns, and on apartment doors. All are supplied with bolts, nuts, and screws required for installation.

For letter box plates with knockers see Section "Letter Box Plates." For a cylinder lock cover with knocker see #853 in Section "Cylinder Lock Covers."
